

Make a Snowy Pinecone Owlet!

Step 1: Go outside and collect some pinecones!

Tip: If you can only find closed pinecones, line a baking sheet with aluminum foil (to collect the sap), lay the pinecones in a single layer, and bake at a low temperature (about 200°F) until they open. It may take a couple hours but they will continue to open after you take them out of the oven.

Step 2: Gather your other supplies

You will need:

Cotton balls

Googly Eyes, Buttons, or paper, markers and glue to make and attach eyes

Step 3: Make your Pinecone Owlet!

Tear cotton balls into small pieces and stuff your pinecone until it is nice and fluffy.

Add your eyes.

Enjoy your new fluffy friend!
