

BUILD A BIRD FEEDER

Help migrating birds find food on their journeys by building a popsicle stick bird feeder for your home!

Use these pictures for ideas. Be creative!

Give birds a perch to stand on!

Add a roof to keep your bird seed dry!

Decorate with markers, but don't use them where the ink might get on the seeds when it rains!

Hang your feeder outside and watch it to see what types of birds stop by! What do you think you'll see?
